

fire and security glazing solutions

FENDOR Ltd

Application: Secondary glazing providing fire protection to the external glazed façade.

No 1 London Wall, London

Contractor: Josef Gartner & Co (UK) Ltd

Architect: Foster & Partners

The location of this new build office block meant that the external façade had to provide fire protection to prevent fire spread to and from neighboring buildings.

The module size of the external façade had to be maintained along with narrow sightlines. To meet this demand Fendor SlimLine insulating system was used to provide side hung opening panels offering 30 minutes integrity and insulation.
