

Application Internal all glass partitions
providing fire and smoke control

North Hertfordshire College

Contractor: Willmott Dixon Construction

Architect: Dyer Associates

The use of Fendor ClearLine fire resistant glass walls with silicone butt joints created the all glass appearance to the office partitions on this project. SwingLine doors with narrow framing were used to provide the entrance door assemblies.

The 2.5m high panels of glass provided 30 minutes integrity only fire resistance and maintained the partition loads appropriate for this application.
