

fire and security glazing solutions

FENDOR Ltd

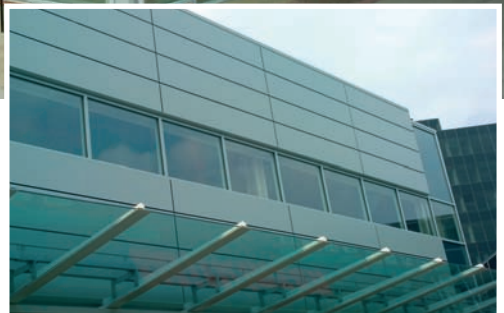

Application: Consistent appearance of framing for both fire resistant and non-fire resistant elements.

Wetherburn Court, Bletchley

Contractor: Bluestone Plc

Architect: Coleman partnership

The need to maintain fire protection to the external glazed elements and provide a matching system for both the non-fire rated and fire rate glazed façade provided the perfect project requirements for Fendor FineLine curtain wall to be utilised.

Clear spans of 5.0m and double glazed units 3.0m x 2.0m meant that mild steel mullions and transoms were used.

The 60 minutes integrity and insulation fire performance was achieved with suitable insulating double glazed units within the fire resistant FineLine system
